Tools: Git, GitHub, Visual Studio Code, PyCharm, WAMP Server, Figma.

Leadership: Team Coordination, Task Allocation, Project Coordination, Technical Troubleshooting, Monthly Reporting, Stakeholder Communication.

PROFESSIONAL EXPERIENCE

Team Lead – Web Technology | SV Medcity / SV University

October 2025 – Present

- Lead web technology activities, coordinate development tasks, and support team members in meeting project requirements and deadlines.
- Manage and maintain a portfolio of 15 main websites and 2 internal software applications.
- Develop and maintain responsive website interfaces using HTML, CSS, JavaScript, jQuery, and Bootstrap.
- Implement backend functionality using PHP and integrate web applications with MySQL databases.
- Design and maintain database structures, implement CRUD operations, and develop SQL queries for application workflows.
- Develop and integrate APIs to support data exchange and communication between applications and databases.
- Work on third-party integrations, including online payment gateway workflows and transaction status handling.
- Configure and maintain cPanel hosting environments, domain settings, DNS records, and SSL/TLS certificates.
- Troubleshoot website errors, application issues, hosting problems, and integration failures.
- Support technical SEO and website performance monitoring using Google Search Console, Google Analytics, and Google Tag Manager.
- Coordinate website content updates, digital assets, event media requirements, and related web technology activities.
- Prepare monthly work reports and communicate project progress and technical requirements to management and internal stakeholders.
- Manage and maintain Google Business Profiles for the hospital, colleges, and university, keeping profile information accurate and up to date.

Web Developer – Web Technology | SV Medcity / SV University

February 2024 – September 2025

- Developed and maintained website pages and responsive user interfaces using HTML, CSS, JavaScript, jQuery, and Bootstrap.
- Implemented backend features and database-driven functionality using PHP and MySQL.
- Built and maintained forms, CRUD operations, validation logic, and AJAX-based interactions.
- Supported API integrations, website updates, bug fixing, and production troubleshooting.
- Assisted with website deployment, hosting configuration, domain and SSL-related maintenance, and technical SEO tasks.

Junior Web Designer | Educurve Learning Solutions LLP

July 2022 – December 2023

- Designed and updated website layouts with a focus on usability, visual consistency, and responsive presentation.
- Created web page structures and styled interface components using HTML and CSS.
- Used JavaScript, jQuery, and Bootstrap where needed to support interactive and responsive website elements.
- Collaborated on website content updates, layout refinements, and cross-device presentation checks.
- Supported website maintenance and resolved basic layout and browser display issues.

SELECTED PROJECTS

1. Hospital, University & College Websites Development

Technologies : HTML5 | CSS3 | Bootstrap 5 | JavaScript | JS Libraries | jQuery | Fetch API | PHP | MySQL

Developed and maintained responsive websites for a hospital, a university, and 7+ affiliated colleges, ensuring consistent design and accessibility across devices. Implemented dynamic website features, database-driven content, and administrative functionality to support institutional website management.

2. Medcare – Patient Lead Management Web Application for Hospital

Technologies : HTML5 | CSS3 | Bootstrap 5 | JavaScript | JS Libraries | Python | Flask | MySQL | AJAX

Developed a hospital patient lead management application to capture, organize, and track patient enquiries.Implemented an administrative panel to manage patient leads, monitor follow-ups, and streamline enquiry handling.

3. JANS – Admission, Career & Grievance Management System

Technologies : HTML5 | CSS3 | Bootstrap 5 | JavaScript | JS Libraries | Python | Flask | MySQL | AJAX

Developed a web application supporting admission management, career opportunities, and grievance handling for a university and its affiliated colleges. Implemented centralized administrative workflows to manage applications, career-related records, and grievances.

4. Medpoint – Internal Ticketing & Communication System

Technologies : HTML5 | CSS3 | Bootstrap 5 | JavaScript | JS Libraries | Python | Flask | MySQL | REST API

Developed an internal ticketing system to manage support requests, track issue status, and coordinate task resolution. Implemented internal chat communication to facilitate collaboration and information sharing among team members.

5. Everly - Alumni, Convocation & Event Management System

Technologies : HTML5 | CSS3 | Bootstrap 5 | JavaScript | JS Libraries | jQuery | PHP | MySQL

Developed a web-based platform for alumni registration, convocation management, and event registrations. Implemented e-certificate management to support certificate generation and distribution for eligible participants.

6. Fertility Center Website & Patient Lead Management

Technologies : HTML5 | CSS3 | Bootstrap 5 | JavaScript | jQuery | Python | Flask | MySQL

Developed a responsive fertility center website to showcase healthcare services and provide an accessible online experience.Integrated patient lead management functionality to capture and organize enquiries for administrative follow-up.

KEY CONTRIBUTIONS

* **Website Portfolio Management:** Managed and maintained 15+ websites and 2 internal software applications across healthcare and educational institutions.

* **Business Application Development:** Contributed to web applications supporting patient lead management, university admissions, career management, grievance handling, and internal ticketing.

* **Web Infrastructure & Technical Operations:** Handled website deployment, hosting administration, domain and DNS configuration, SSL/TLS maintenance, and technical troubleshooting.

* **Team Coordination:** Coordinated development activities, allocated tasks, monitored project progress, and communicated technical requirements to management and internal stakeholders.

EDUCATION

Master of Science (M.Sc.) – Cyber Forensics and Information Security (Distance Education)

University of Madras | 2024

Bachelor of Science (B.Sc.) in Computer Science

D.R.B.C.C.C Hindu College | 2022

PROFESSIONAL HIGHLIGHTS

Full Stack Web Development | Frontend & Backend Integration | Responsive Website Development | Python & Flask Application Development | PHP & MySQL Development | REST API & Third-Party Integrations | Database Design & Management | Website Deployment & Hosting Administration | cPanel, DNS & SSL/TLS Configuration | Technical SEO & Google Business Profile Management | Payment Gateway & Email/SMTP Integration | Multi-Website Management | Team Leadership, Project Coordination & Technical Troubleshooting.
